

Warranty Policy

Fiero Aero specializes in Temperature Switches, Sensors and Detectors and is currently operating at a near 0% warranty rate. The vast majority of the products Fiero Aero will recertify are non-repairable products and cannot be fixed if they have a failure or defect. If Fiero fails to detect a problem and ships the unit with a defect, Fiero will refund or credit the customer for the labor costs that were charged to recertify that particular product. The warranty period is for 1 year from the date on the 8130-3.
